

2025 Medicare Part D Coverage

A quick guide for patients taking VYNDAMAX

In 2025: \$2000 is the out-of-pocket (OOP) cap for covered Medicare Part D medicines. Once you reach the OOP cap, you will pay **\$0** for all covered medicines **for the rest of the year.**¹

There will now be 3 phases of Medicare Part D coverage: deductible, initial coverage, and catastrophic coverage.¹ During each phase, you will pay your health plan's premium each month. The amount you pay for your medicines depends on which phase of Medicare Part D you are in.¹⁻³ These phases apply to **all** your medicines that are covered by Medicare Part D.¹

In 2025,

 The phases of Medicare Part D reset on January 1 of each new benefit year^{1,3}

New in 2025: Medicare Prescription Payment Plan^{2*}

The Medicare Prescription Payment Plan is a new program for Medicare Part D. The health plan must give patients who enroll the choice to pay for their medicines in monthly installments.[†]

You can spread the costs of your prescription medicines over 1 calendar year

When enrolled, you pay \$0 at the pharmacy

The program is voluntary. You can enroll during open enrollment or anytime in the plan year

Your health plan sends you monthly bills for cost-sharing

*There is no fee to join the plan. This plan does not cover a patient's monthly premium.^{2,3}

†You need to opt in to the payment plan before filling your prescription.^{2,3}
